

Exercise - CSS

Create the following page using css (html part is the same as in the previous exercise but now you need to implement CSS part in this exercise) (max 3p).

MLDE

Icons | Font Awesome | CSS Great Font Pairings | Tryit Editor v3.7 | CSS Styling Links | Tryit Editor v3.7 | Tryit Editor v3.7 | 100 color combinations | autumn finland - Google |

File | X:/Opetus/2022-kevät/Web-programming/harjoitukset/solutions/ex2.html

Apps

Reading list

MLDE group - starting 2021 autumn

Group Activities

- International week - 10 - 14 January 2022
- Welcoming parties - 14 January at 5 pm, meeting at the university restaurant Tekuila
- Excursion to Pyhä - 3-5 February (Cancelled)

Courses spring 2022 (the information below must be inside the table element)

Course Name	Credits	Teacher
Web Programming	5cr	Aku Kesti
Project Management	5cr	Juhani Angelva
Finnish / Swedish	5cr	Tuija Haapasalmi
IOT	5cr	Tommi Kokko

Rovaniemi in winter

Our campus

Summer in Finland

Autumn in Finland

Some useful links (use order list with type attribute below)

- A. [Lapin.amk](#)
- B. [Rovaniemi.city](#)
- C. [Esa.fi](#)

Average temperatures in Rovaniemi

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
-18	-11	-5	-2	5	14	18	19	15	5	-3	-10

Requirements and hints

- You have to use separate .css file in which you define all the styles
- You should use pairing font rules for titles and other texts as explained at https://www.w3schools.com/css/css_font_pairings.asp (you can choose one of those recommended). Hint: you can implement this in your css by defining all the fonts to be something
* { font-family: Arial}
and then separately you may define that the titles are following certain fonts e.g.
h1,h2,h3 { font-family: Times New Roman}
- Use red color in headings
- Use border-bottom property for table rows
- Both tables should be 50% width
- Use zebra stripes for columns in the temperatures table -> you need to give the class attribute for the table so that you are able to do the specific style for it
- Links should follow the rules:
 - o If visited -> color is red
 - o If mouse over, color is pink
- There should be two photos on the same row. Just for testing purposes add one more photo (autumn.jpg) so that there will be four photos on the page (use float property). Define also padding so that the photos have a little space in between. Also remember to define
* { box-sizing: border-box; } so that it will make it easier to use float property
- Try icons in some html elements
- Use a background-color property in list items + margin + padding
