

# Exercise – HTML FORMS

Create the following form. Use css for styling.

The screenshot shows a web browser window with a single tab titled 'ex3.html'. The address bar shows the file path 'file:///H:/Opetus/20...'. The browser's toolbar includes navigation buttons (back, forward, refresh), a search icon, and a 'Paused' status. Below the toolbar, there are shortcuts for 'Apps', 'New Tab', 'WhatsApp', and 'Google', along with a 'Reading list' icon. The main content area displays a registration form on a yellow background. The form is titled 'Registration form' and is divided into sections: 'Personal information', 'Study information', and 'Other'. The 'Personal information' section includes fields for 'First name', 'Lastname', and 'E-mail', as well as a 'Sex' section with radio buttons for 'Woman' and 'Man'. The 'Study information' section includes a 'Date of Birth' field with a calendar icon and a 'Programme' dropdown menu currently set to 'Machine Learning'. The 'Course selections spring 2022' section includes three checkboxes for 'Industrial Project', 'Web Programming', and 'IOT'. The 'Other' section includes a large text area for additional comments and a 'Send' button at the bottom.

**Registration form**

**Personal information**

First name

Lastname

E-mail:

Sex

☐ Woman

☐ Man

Date of Birth:  

**Study information**

Programme

**Course selections spring 2022**

☐ Industrial Project
